

MFI ACCOUNTS RECEIVABLE USER GUIDE (BOOKKEEPER)

Presentation By

CORPORATE IT-SYSDEV FARMS
TEAM

INTRODUCTION TO AR SYSTEM

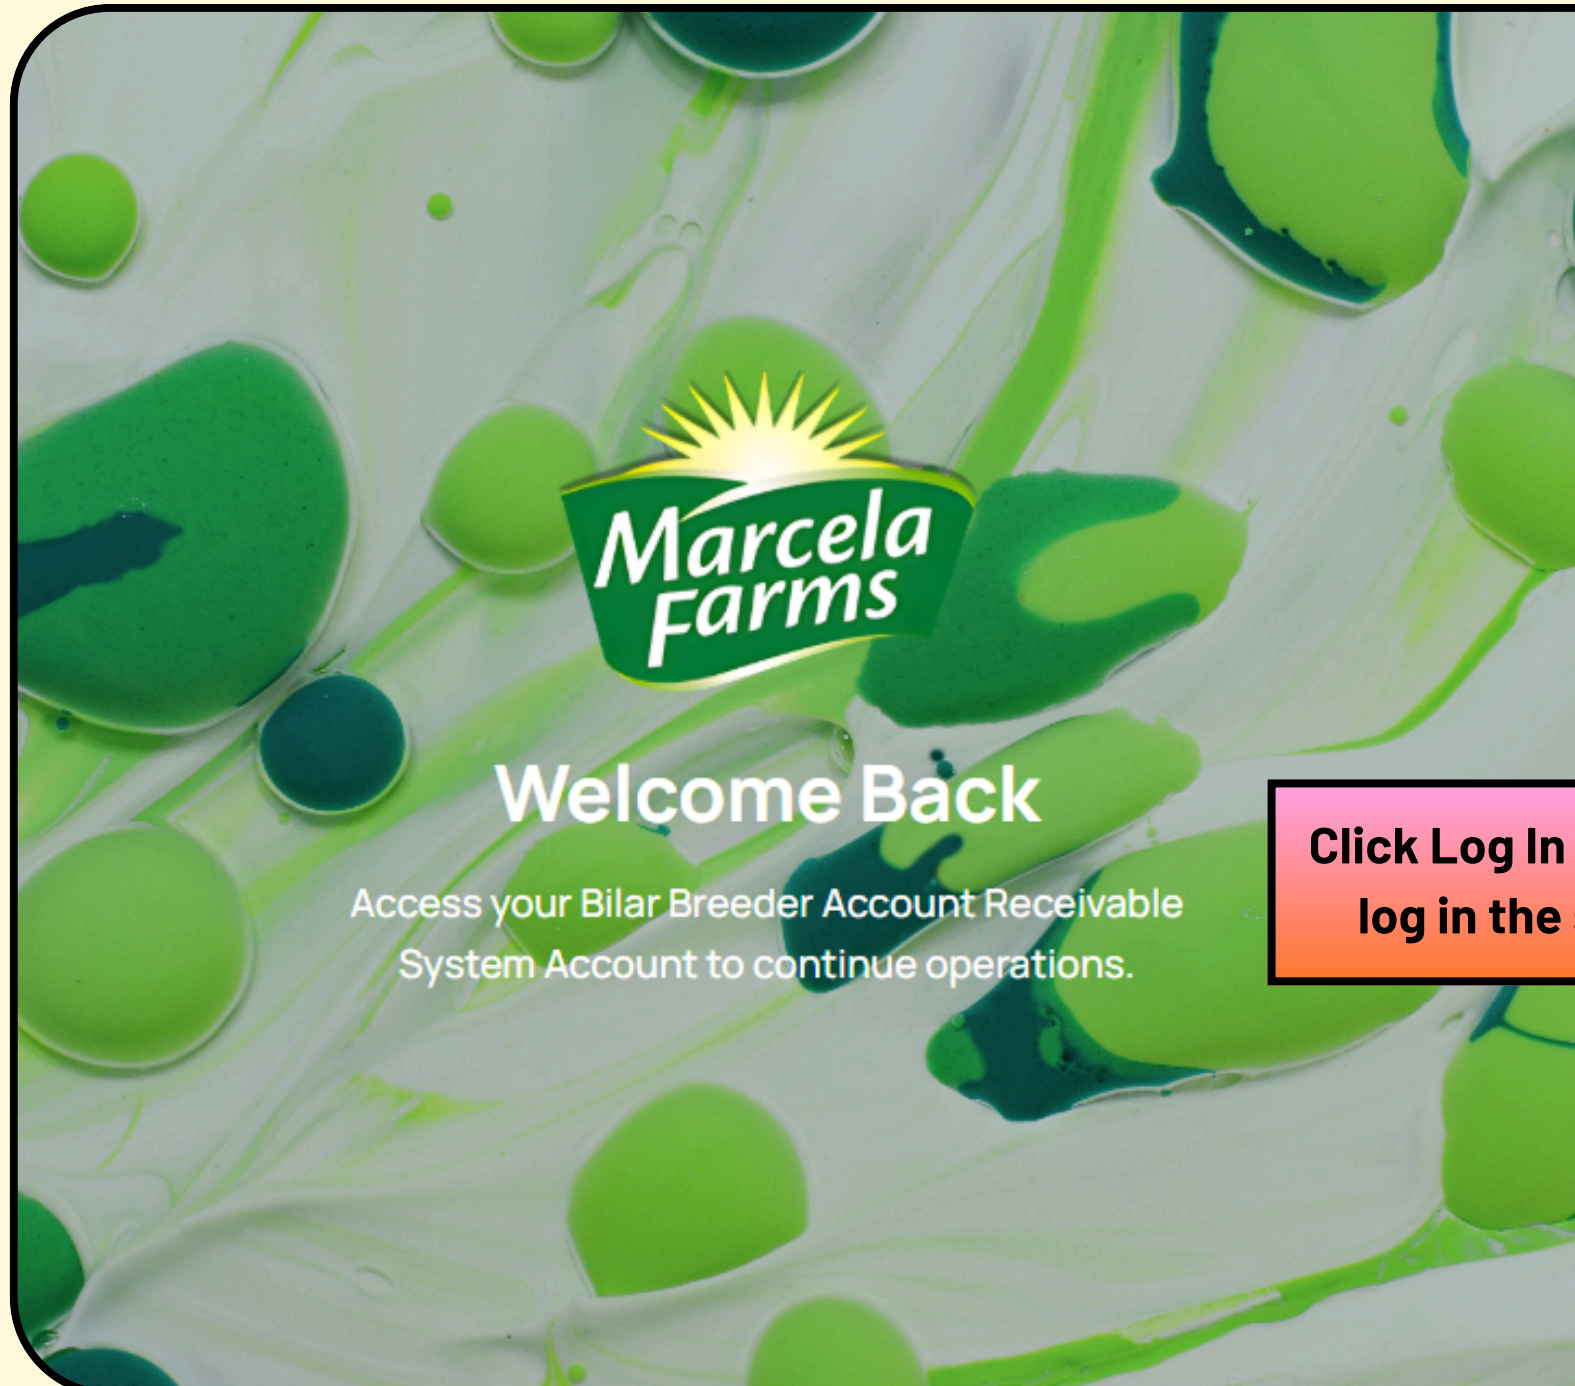

The **Accounts Receivable (AR) System** is a financial management platform that facilitates:

Invoice Module – Generating invoices for other income.

Adjustment Module – Modifying Sales Invoices and Charge Invoices to correct discrepancies or apply credit/debit memos.

Payment Module – Recording customer payments, where the associated Sales Invoices originate from the In-House Invoicing System.

LOG IN

Click Log In button to
log in the system
